POPURI VIJAYARAJU

Java Backend Developer

vijaypopuri2021@gmail.com | 8143169416 | Bengaluru, India | linkedin | Github

SUMMARY

Software Engineer with 2+ years of experience building scalable backend systems, REST APIs, and cloud-native microservices using Java, Spring Boot, PostgreSQL, and AWS. Experienced in designing production-ready features from requirement gathering to deployment, integrating third party services, optimizing distributed systems, and delivering reliable payment and business workflows. Passionate about building developer friendly APIs and scalable financial products.

SKILLS

Programming Skills
Java, SQL

Frameworks & Technologies
SpringBoot, Spring Data JPA, Microservices, RESTAPIs, Hibernate(ORM)

Databases
PostgreSQL, MySQL, MongoDB

Development Tools
Eclipse, VSCode, STS

Cloud & DevOps
AWS (EC2, S3, Lambda, SQS, ECS, RDS), Docker, Maven,GitHub Actions, CI/CD

Messaging & Caching
Kafka, Redis

Software Engineering
OOP, Multithreading, SDLC, Agile, Backend System Design, Secure Coding,API Design, Database Design

Testing
Junit 5, Mockito

AI-Assisted Developmen
GitHub Copilot, ChatGPT

Practices
SOLID Principles, Design Patterns, Code Review, Debugging Unit Testing

PROFESSIONAL EXPERIENCE

Java Backend Developer | Onoark India Pvt Ltd | May 2024 – Present

- Designed, developed, and owned 100+ production REST APIs from requirement analysis through deployment, enabling multiple business workflows across enterprise applications.
- Designed REST API contracts following REST principles with authentication, validation, standardized error handling, pagination, and versioning for scalable client integrations..
- Collaborated with product managers and frontend developers to understand business requirements and translate them into scalable backend solutions.
- Built scalable backend services by implementing business logic, third-party API integrations, authentication, request validation, centralized exception handling, and comprehensive logging to ensure secure and reliable communication.
- Developed asynchronous processing and notification services using Spring Boot (@Async), optimized SQL queries and improved application performance, scalability, resiliency, and operational stability.
- Monitored production applications, debugged issues, analyzed logs, performed root cause analysis, and resolved production incidents to ensure high application availability and reliability.
- Participated in the complete Software Development Life Cycle (SDLC), including requirement analysis, design, development, testing, deployment, code reviews, and production support within Agile teams.
- Built backend features from initial requirements through implementation, testing, deployment, and production monitoring in Agile sprints.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science and Engineering 06/2020 – 05/2024
Bapatla Engineering College | CGPA: 8.5/10

CERTIFICATES

Java Certification
Wipro TalentNext

PROJECTS

Cloud-Native Microservices Platform

- Tech Stack: Java 17, Spring Boot, Spring Cloud, Spring Cloud Gateway, Netflix Eureka, PostgreSQL, Redis, JWT, Docker, GitHub Actions, AWS EC2, Ollama
- Designed and developed a distributed microservices platform using Java 17, Spring Boot, Spring Cloud, API Gateway, and Eureka, enabling scalable service discovery, routing, and inter-service communication
- Built secure and scalable RESTful APIs with JWT-based authentication, request validation, centralized exception handling, and Redis caching to improve application security and performance.
- Implemented Saga-based distributed transaction management for reliable communication across microservices while maintaining data consistency in distributed workflows.
- Containerized microservices using Docker and automated build, testing, and deployment through GitHub Actions, deploying services on AWS EC2 using CI/CD pipelines.
- Integrated Ollama LLM with Spring Boot to develop an AI-powered chatbot capable of providing real-time conversational responses through secure REST APIs
